**In your LATTE course:**

Turn editing on.

Scroll down to the bottom of the right-hand column. You'll see the option to add a block (indicated by red arrow below).

From the pulldown ‘blocks’ menu, select ‘HTML’. Your new block will appear.

Click on the pencil icon to edit your new HTML block. A window will open that looks like this:
Click the icon that looks like this <> (indicated by red arrow above) to toggle the HTML source. The resulting window looks like this:

Leave this window open in LATTE, and open another browser window to go to Poll Everywhere (www.polleverywhere.com).
**In Poll Everywhere:**

Log in to your account and create a poll, if you have not already done so. Once you have a poll created, you'll see a tab on the right side called 'share and publish'.

Click that, and you'll see more options open underneath the 'share and publish' heading.

To embed the poll into your LATTE course, you'll want to click the option called 'blog or web page' (see red arrow in screen shot below):

![Poll Everywhere screenshot](image-url)
You will then come to a page that looks like this:

Under the section near the top titled 'Web Voting Widget', select and copy the entire snippet of code in the box indicated by the red arrow.
Back to LATTE!

Paste the code snippet into the box after the `<br />` tag that is already there. The result will look something like this:

```html
<script language="javascript" src="http://www.polleverywhere.com/multiple_choice_polls/LTHxMjgNTQUNj0/web.js?height=250&results_count_format=percent&width=300" type="text/javascript"></script>
<div style="font-size: 0.75em">Make your own <a href="http://www.polleverywhere.com/">poll voting questions</a> with <a href="http://www.polleverywhere.com/">Poll Everywhere</a></div>
```

Click the ‘save changes’ button at the bottom.
Your poll will now appear in your LATTE page.

The embedded poll will update live as results are submitted.

If your poll is a multiple choice poll, the choices appear as hyperlinks. Students have the added option of voting directly via LATTE by clicking on one of the choices given in your poll.
Once a participant casts their vote, current poll results are displayed.
