

Heller Brown Rooms G53, 54, 55

Wireless internet access is available in the conference room!

Technology instructions

Acquire key from administrative offices

Each room contains a 50" wall-mounted plasma display panel (PDP).

Turning on the system:

Locate the plasma remote control, *either* attached to the side of the plasma screen or stored in the instructor cart. **If remote is missing, controls are also on the bottom of the flat screen.**

1. Point the remote at the screen, and push the "**ON**" button.
2. Select input choices with the "**SOURCE**" button.
3. *If you cannot find the remote, these controls are accessible, on the bottom of the plasma screen.*

Laptop Display:

- There are two laptop connection points in the room, one in the conference table pop-up, and one on top of the equipment storage cart.
- We recommend turning on the plasma and selecting input "**PC2**" prior to connecting & turning on your laptop.
- Now that the plasma display is ON, connect your laptop to **either**: the table pop-up using the supplied 15 pin cable w/audio, **or** the 2nd connecting cable at the corner cart. At this point, turn on your laptop. **** Limit your laptop resolution, no higher than XGA (1024x768) or WXGA (1280x768) in these rooms. **** When signal is sent to screen, the pop up LED is **green**.
- **To access the network**, use your UNET name and password, in the USERS domain. ****For wireless connectivity, you may also log in as a guest user with your email address, once your laptop card recognizes the network.**)

Volume levels:

Control them using the plasma remote control, or directly on the bottom of the plasma: **VOL + or -**. Use the "**MUTE**" button only when desired.

VHS, DVD, or other media display:

Inside the equipment cart, you will find the **VHS & DVD players**, into which you may insert your tape or disc.

1. On the plasma remote control, select "**AV**" for the VHS player, or select "**COMPONENT**" for the DVD player. Source select confirmation appears on the screen's top left hand corner.
2. Use the VCR or DVD controls on the units themselves, or on the provided remote controls, stored in the instructor cart. An infrared repeater, located on top of the plasma screen, will allow you to use these remotes in the conference room, with the equipment cart door closed.
3. Audio CD's can also be played on the dvd player, or on your laptop's cd/dvd drive.
4. **Other media choices** may be played by ordering support equipment from Media Technology Services @ 6-4632 or 6-4429.

Please turn off all items when finished. Return remotes to proper storage. Thank You!
