

Old South St, Rm. 121, Portable System

Access: via department administrators

This room provides a portable Dukane Media Presentation System, with a department-provided data projector that can be focused on a wall-mounted screen. Screen control is manual.

Displaying Laptop

1. To operate the display system, roll the Dukane cart into place, and place your projector on the front middle shelf. Projector is owned by resident department administrators. **Call Media Technology Services (MTS) @ ext. 6-4632 for assistance in borrowing any additional equipment.**
2. **You can place your laptop on the top shelf, or the side shelf. A laptop cable, with an attached audio connector, is available on the cart..**
3. You can plug your laptop and projector power cords into a cart power strip. Then, *extend and plug the cart extension cord into the nearest wall power outlet.*
4. **Press the “I/O” button on the laptop and the projector to power things ON.** Allow the projector to warm up for approximately 45 seconds. While waiting, log onto your laptop and if needed, activate the external video connector.
5. After warm up is complete, **press the INPUT button** waiting momentarily at each input until you locate the laptop input.
6. **Laptop display** is provided using a **VGA cable** with an attached audio connector, **typically on site at the cart.** **MAC users must provide their own MAC adapter.** **BEST PRACTICE TIP: For small portable data projectors, we recommend a resolution of 1024x768 (XGA) for best results.**
7. **PC LOGON:** Use your UNET name & password, in USERS domain. Going wireless? Logon as a “guest user” with your email address, by opening a web browser once your card detects the network.
8. **Volume: Be sure to connect the attached audio connector to your laptop’s headphone output. Volume levels may be controlled using the VOLUME knob on the cart speaker system.**
9. You can play dvd or cd discs in your laptop’s disc drive.
10. Control **volume levels** as described above.

When Finished

1. On the remote, **Press the projector’s “I/O” power button two (2) times**, to shut down. **Be sure the projector powers off, the that the fan operates during a 90 second cool down to help save lamp life and energy!** Return projector or any other equipment to department administrators or as requested.
2. Please neaten up and return cables to their locations when done.

Ships fully integrated & completely assembled!

**New!
